Edwin I. Hatch Nuclear Plant
Revisions to 1994 Annual Radioactive Effluent Release Report

Gentlemen:

Enclosed are five revised pages of the Plant Hatch Annual Radioactive Effluent Release Report for 1994, which Georgia Power Company transmitted to the NRC by letter dated April 19, 1995. Due to a typographical error in the laboratory analysis report, the Unit 2 liquid tritium releases in the third quarter were reported to be 1.46 curies less than the actual releases (i.e., 1.41 curies rather than 2.87 curies). Also, the offsite doses for organs were calculated to be up to 0.02 microrem less than the actual doses.

Should you have questions in this regard, please contact this office.

Sincerely,

J. T. Beckham, Jr.

SRM/ld
