SUBJECT: Catawba Nuclear Station
Docket Nos. 50-413 and 50-414
Proposed Technical Specification Supplement

Gentlemen:

On December 18, 1991, we transmitted proposed license amendments to Appendix A, Technical Specifications, of Facility Operating Licenses NPF-35 and NPF-52 for Catawba Nuclear Station Units 1 and 2 respectively.

The revisions were necessary due to the recent reorganization that Duke Power Company implemented. Based on discussions with the NRC staff concerning these revisions, we are supplementing our changes of December 18, 1991.

Attachment 1 contains a mark-up of the pages showing the proposed Technical Specification change supplements. Attachment 2 contains the summary and bases of the supplemental changes.

If you have any questions concerning these proposed amendments or if additional information is required, please contact R. L. Futrell at (803) 831-3665.

Very truly yours,

M. S. Tuckman
Vice President
