Docket #50-352
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

RE: LEA Findings of Fact and
Conclusions of Law on I-42

Gentlemen:

LEA hereby transmits page 7 from the copies of LEA's Findings of Fact and Conclusions of Law on LEA Contention I-42 (Environmental Qualification of Electrical Equipment).

A conference call took place this morning between the NRC Staff, Applicant's counsel and LEA regarding the fact that the copies hand delivered to Washington D.C. on June 21 on the above referenced subject matter were missing page 7. At that time, LEA had already transmitted this page to the parties. However, due to the time constraints that other parties have to respond to these findings of fact, LEA is sending a copy by Express Mail to avoid any possible delays.

We sincerely apologize for any inconvenience that this may have caused any of the parties, particularly the NRC Staff, Applicant and the Board.

Respectfully submitted,

Maureen Mulligan

MAUREEN MULLIGAN, LEA V. PRESIDENT

DSO 3

13. However, the 'E' classification refers to Class '1E' electrical equipment, which is safety related equipment. Mr. Stanley then stated that it was his belief that the combination of the 'E' designation and the '4F' designation encompasses the scope of the new rule under 10 C.F.R. § 50.49. Tr. 9571, 9572 (Stanley)

14. Page 3-9 of the Quadrex Component Classification Program Rules defines category 'F' and provides further discussion in sub-sections 3.6.1 through 3.6.4. which refers only to accident monitoring equipment.

Mr. Thompson testified that the Quadrex Component Classification Program (CCP) Rules included 'important to safety' equipment under the 'F' designation, but was unable to provide a reference to any other information in the report that indicated that category 'F' related to anything other than accident monitoring equipment. Tr. 9573, 9574. (Thompson) Tr. 9598, 9599 (Thompson)

There has been no compliance with 10 C.F.R. § 50.49 if the Applicant has failed to make a thorough study to determine what equipment is important to safety other than accident monitoring equipment. Section 9 of the Quadrex Component Classification Program (CCP) Rules includes no discussion of equipment that is important to safety. Tr. 9566 (Stanley). Mr. Stanley's reference to page 9-4 of the CCP Rules (9567) corresponds to the table provided for comparison purposes on page 24 of Applicant's testimony. Tr. 9571 (Boyer) Although the testimony states that category '4F' electrical equipment is considered to correspond to 10 C.F.R. § 50.49 (b)(2), cross-examination revealed that this refers only to accident monitoring equipment. Tr. 9573, 9574 (Thompson)
