

Docket No. 50-252

JUN 22 1984

Dr. David M. Woodall
Reactor Administrator
Nuclear Engineering Department
University of New Mexico
Albuquerque, New Mexico 87131

Dear Dr. Woodall:

The staff has completed its initial review of the proposed University of New Mexico research reactor emergency plan submitted on October 24, 1982. The plan was reviewed against the requirements of Appendix E to 10 CFR Part 50, the guidance criteria set forth in Revision 1 to Regulatory Guide 2.6 and ANSI/ANS-15.16-1982, "Emergency Planning for Research Reactors." Non-power reactor licensees were requested by generic letter dated June 16, 1982 to use these documents to meet the requirements of the amended emergency planning regulations.

Based on its review, the staff has concluded that the proposed University of New Mexico emergency plan does not yet fully satisfy the requirements of the guidelines of the above-mentioned documents. Accordingly, we request that you revise the plan to include the additional information identified in the enclosed staff Emergency Plan Review within 60 days of the date of this letter. Following receipt of your revisions, the staff will continue its review. If you have any questions, please contact Harold Bernard, our Project Manager for your facility, at (301) 492-9799.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

Sincerely,

151

Cecil O. Thomas, Chief
Standardization & Special
Projects Branch
Division of Licensing
