results of its efforts to ascertain the status on November 30, 1985, of 1) the levels of silicone oil in the GEMS level transmitters whose qualification is at issue in the proceeding, and 2) the lubricant being utilized in the containment fan motors and room coolers outside containment whose qualification is at issue in this proceeding; and it is

Service of the staff's rebuttal testimony and APCo's surrebuttal testimony upon the Board and opposing counsel shall be by overnight express mail or other comparable method. Copies of APCo's report to the Board on the November 30, 1985 status of certain Farley equipment and of any motion to strike/motion in limine and any response thereto shall be provided to the Board and opposing counsel by facsimile or other method that will ensure receipt by close of business (4:30 p.m. EST/EDT) on the designated filing date.
