

UNITED STATES ATOMIC ENERGY COMMISSION

NOTICE OF ISSUANCE OF FACILITY LICENSE AMENDMENT

LOCKHEED AIRCRAFT CORPORATION, DOCKET NO. 50-172

AND THE DEPARTMENT OF THE AIR FORCE, DOCKET NO. 50-176

Please take notice that the Atomic Energy Commission has issued, effective as of the date of issuance, Amendment No. 1, set forth below, to Facility License No. R-86, as amended. The amendment authorizes Lockheed Aircraft Corporation to relocate the rod seated switches from the bottom of the core to the hold down plate at the top of core, as described in the licensee's applications for license amendment dated July 25, 1962.

The Commission has found that:

- (1) Operation of the reactor in accordance with the license as amended will not present undue hazard to the health and safety of the public and will not be inimical to the common defense and security;
- (2) The application for amendment complies with the requirements of the Atomic Energy Act of 1954, as amended, and the Commission's regulations set forth in Title 10, Chapter 1, CFR;
- (3) Prior public notice of proposed issuance of this amendment is not necessary in the public interest since operation of the reactor in accordance with the license, as amended, will not present any substantial change in the hazards to the health and safety of the public from those considered and evaluated in connection with the previously approved operation.

Within fifteen (15) days from the date of publication of this notice in the Federal Register, the applicant may file a request for a hearing, and any person whose interest may be affected by this proceeding may file a

petition for leave to intervene. Requests for a hearing and petitions to intervene shall be filed in accordance with the provisions of the Commission's Regulation (10 CFR 2). If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in this notice, the Commission will issue a notice of hearing or an appropriate order.

For further details with respect to this amendment, see (1) a related hazards analysis prepared by the Test & Power Reactor Safety Branch of the Division of Licensing and Regulation and (2) the licensee's application for license amendment dated July 25, 1962, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. A copy of item (1) above may be obtained at the Commission's Public Document Room, or upon request, addressed to the Atomic Energy Commission, Washington, D. C., Attention: Director, Division of Licensing and Regulation.
