

UNITED STATES NUCLEAR REGULATORY COMMISSIONNORTHEAST NUCLEAR ENERGY COMPANYDOCKET NO. 50-336NOTICE OF WITHDRAWAL OF APPLICATION FOR
AMENDMENT TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Northeast Nuclear Energy Company (the licensee) to withdraw its December 16, 1994, application for proposed amendment to Facility Operating License No. DPR-65 for the Millstone Nuclear Power Station, Unit No. 2 located in New London County, Connecticut.

The proposed amendment would have revised the Technical Specifications to require the wind direction and wind speed sensors at the 142 foot elevation to identify the data to determine action required to preclude flood damage to the Service Water Pumps. Also the proposed change would have corrected a typographical error in the location of the sensors at the 374 foot elevation.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the FEDERAL REGISTER on February 1, 1995 (60 FR 6303). However, by letter dated September 18, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated December 16, 1994, and the licensee's letter dated September 18, 1995, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public

Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Learning Resource Center, Three Rivers Community-Technical College, Thames Valley Campus, 574 New London Turnpike, Norwich, CT 06360.

Dated at Rockville, Maryland, this 25th day of September 1995.

FOR THE NUCLEAR REGULATORY COMMISSION

Guy S. Vissing, Senior Project Manager
Project Directorate I-3
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
