

22 OCT 1987

Docket No. 50-336
File RI-87-A-100

[REDACTED]
Yale Medical Clinic
333 Cedar Street
New Haven, Connecticut 06510

Dear [REDACTED]

This is a follow-up to my September 22, 1987 letter to you concerning a potential radiation exposure of an individual about July 16, 1987. You also identified a potential concern about exposure to asbestos.

In this case, our resident inspector's check found that the event which may have resulted in the concern about radiation exposure was a drill exercise which involved no radioactive materials or actual personnel exposures. Also, we were informed by the Millstone 2 staff that the last asbestos at Millstone 2 had been removed in 1986. The alleger has neither contacted us to provide more information nor relayed further information through you. Therefore, we have closed this allegation as unsubstantiated. If additional information becomes available, however, we will reconsider this classification.

Thank you for contacting us on these matters. If you have any additional information or questions, please contact me (215-337-5231) or Monte Conner of my staff (215-337-5104).

Sincerely,

Ebe C. McCabe, Jr., Chief
Reactor Projects Section 1B
Division of Reactor Projects
