Huntersville, NC 28078-8985

SUBJECT: SYSTEMATIC ASSESSMENT OF LICENSEE PERFORMANCE (SALP) MCGUIRE NUCLEAR  
STATION (REPORT NOS. 50-369/95-99 AND 50-370/95-99)

Gentlemen:

The NRC Systematic Assessment of Licensee Performance (SALP) has been completed for your McGuire facility. The facility was evaluated for the period of February 6, 1994, through August 12, 1995. The results of the evaluation are documented in the enclosed SALP report. This report will be discussed with you at a public meeting to be held at the McGuire site on October 2, 1995, at 2:00 p.m.

This SALP assessed facility performance as being good in plant operations and maintenance, and as superior in engineering and plant support. The performance improvement demonstrated in all functional areas is a result of increased management oversight and involvement, a number of innovative process and organizational initiatives, and comprehensive self-assessments. Notwithstanding recognition of significant improvement in maintenance and engineering performance, continued focus on work control, backlog management and the Top Equipment Problem Resolution Process remains a challenge. Additional attention is also warranted for certain communication and interfacing challenges identified in the SALP report.

In accordance with Section 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions or comments, I would be pleased to discuss them with you. I look forward to discussing this assessment with you on October 2, 1995.

Sincerely,

Original signed by:
