Docket Nos. 50-317
and 50-318

Mr. A. E. Lundvall, Jr.
Vice President - Supply
Baltimore Gas & Electric Company
P. O. Box 1475
Baltimore, Maryland 21203

Dear Mr. Lundvall:

We are presently reviewing the Calvert Cliffs Units 1 and 2 Procedures Generation Package (PGP) submitted by your letter dated March 14, 1984. The PGP, as specified in Generic Letter 82-33, consists of: (1) Plant-Specific Technical Guidelines, (2) Plant-Specific Writer's Guide, (3) Description of the Validation/Verification Program for EOPs, and (4) Description of the Training Program for Upgraded EOPs.

Your March 14, 1984 letter contained items 2, 3 and 4, but omitted item 1, Plant-Specific Technical Guidelines. So that we may conduct our review of the Plant-Specific Technical Guidelines, the following information should be provided to address this portion of the PGP within 30 days of receipt of this letter:

- (1) A description of the process used to determine the applicability of the actions specified in the referenced generic technical guidelines to your plant. This description should include a discussion of how the engineering evaluation or analysis, at the specific operator action step level, was performed to modify the generic guidelines to apply them to Calvert Cliffs Units 1 and 2.
- (2) If the process described in item 1 identifies any safety significant deviations from, or additions to the generic technical guidelines (because of different plant equipment operating characteristics or design), the submittal should: (a) describe the evaluation performed to determine the safety significance of the deviations, (b) identify the safety significant deviations or additions found, and (c) provide the technical justification (i.e., engineering evaluation or analysis, as appropriate) for the plant-specific approach.

We are currently conducting a detailed review of the Plant-Specific Writer's Guide, the Validation/Verification Program and the Training Program.
