Docket No. 50-339

Virginia Electric and Power Company  
ATTN: Mr. W. L. Stewart  
Vice President - Nuclear Operations  
Post Office Box 26666  
Richmond, Virginia 23261

Gentlemen:

We have received a copy of your application dated March 15, 1984, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application proposed Technical Specification changes to delete certain surveillance requirements for diesel generators for the North Anna Power Station Unit No. 2. With letter dated March 23, 1984, your Company remitted a Class III fee (\$4,000) pursuant to 10 CFR 170.22.

Based on information provided by the ONRR staff as the result of their preliminary review of your application, it has been determined that this application should be exempted from fees under Footnote 2 of 10 CFR 170.22 since the changes are to simplify and clarify the Technical Specifications, have minor safety significance, and are requested for the convenience of the Commission. On this basis, it has been determined that an exemption pursuant to 10 CFR 170.11(b) from the fee requirements is authorized by law, and such exemption is otherwise in the public interest and is hereby granted for your March 15 application. Accordingly, we have concurrently authorized the Division of Accounting and Finance to refund \$4,000 to your Company. Refunds are generally processed within a two-week period.

Sincerely,

Original Signed by  
Wm. O. Miller
