

ENCLOSURE 1

NOTICE OF VIOLATION

Duquesne Light Company
Beaver Valley Power Station, Unit 2

Docket No. 50-412
License No. NPF-73

During NRC inspections from July 18 to August 28, 1995, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

Technical Specification 3.5.4 requires that reactor coolant pump seal injection flow shall be less than or equal to 28 gpm with the charging pump discharge pressure greater than or equal to 2410 psig and the seal injection flow control valve full open. With the seal injection flow not within the limit, adjust manual seal injection throttle valves to give a flow within the limit with the charging pump discharge pressure greater than or equal to 2410 psig and the seal injection flow control valve full open within 4 hours or be in at least HOT STANDBY within the next 6 hours.

Contrary to the above, between March 22 and March 23, and between July 23 and July 25, 1995, reactor coolant pump seal injection flow exceeded 28 gpm and was not restored within limits within 4 hours.

This is a Severity Level IV violation (Supplement I).

Pursuant to the provisions of 10 CFR 2.201, the Duquesne Light Company is hereby required to submit a written statement or explanation to the U. S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region I, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Any Safeguards Information, as defined in 10 CFR 73.21, contained in your submittal should be included in an enclosure so that the transmittal letter without the Safeguards Information can be placed in the NRC's Public Document Room in accordance with 10 CFR 2.790(a).
