SUBJECT: COOPER NUCLEAR STATION - WITHDRAWAL OF LICENSE AMENDMENT REQUEST
(TAC NO. M87728)

Dear Mr. Horn:

By letter dated August 31, 1993, the Nebraska Public Power District (NPPD) applied for amendment to Facility Operating License No. DPR-46 for the Cooper Nuclear Station (CNS). The proposed changes would have modified the facility technical specifications pertaining to the standby gas treatment system, secondary containment, and primary containment isolation valves.

Subsequently, NPPD determined that it would not pursue this issue; and, in a telephone conversation on September 14, 1995, between Mr. Robert Godley of your staff and me, Mr. Godley confirmed that NPPD planned to withdraw the amendment. By letter dated September 19, 1995, we informed you that the NRC would consider the proposed amendment to be withdrawn unless you notified us by October 2, 1995, that our understanding was incorrect. Since the allotted time has passed and you have not responded, we consider the amendment request withdrawn.

The Commission has filed the enclosed Notice of Withdrawal of Application for Amendment to Facility Operating License with the Office of the Federal Register for publication.

Sincerely,
