Gentlemen:

SUBJECT: REPORT NOS. 50-413/84-25 AND 50-414/84-10

On February 21-23, 1984, NRC inspected activities authorized by NRC Construction Perimt Nos. CPPR-116 and CPPR-117 for your Catawba facility. At a March 8, 1984, meeting held at the NRC Region II Office and again on March 26, 1984 at the Catawba facility, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements and other activities appeared to deviate from a commitment to the NRC. The violation and deviation, with pertinent references and elements to be included in your response, are presented in the enclosed Notices.

In addition to the need for corrective action regarding the specific matters identified in the enclosed Notices, we are concerned about the implementation of your management control systems that permitted this situation to develop. Consequently, your response should describe those particular actions taken or planned to improve the effectiveness of your program.

In accordance with 10 CFR 2.790(a), a copy of this letter, its enclosures, and your reply will be placed in NRC's Public Document Room upon completion of our evaluation of the reply. If you wish to withhold information contained therein, please notify this office by telephone and include a written application to withhold information in your response. Such application must be consistent with the requirements of 2.790(b)(1).
