Dear Mr. Hukill:

The purpose of this letter is to clarify and document the review status of NUREG-0737 Action Items II.E.1.1 "Auxiliary Feedwater System Evaluation" and II.E.1.2 "Auxiliary Feedwater System Automatic Initiation and Flow Indication" for TMI-1. Based principally upon the activities surrounding the TMI-1 Restart Proceeding, which included extensive review and evaluation of the TMI-1 EFW system as documented primarily in NUREG-0680 "TMI-1 Restart", we consider our review activity for Item II.E.1.1 to be complete with the exception of one confirmatory item pertaining to emergency power bus loadings. Specifically, in your August 23, 1983 letter you indicate that you will be performing a review of emergency power bus loadings to assure that the long-term EFW system modifications will not result in bus loadings exceeding acceptable limits. We request that you submit this review for our information when it is complete, but in any case, by no later than 90 days prior to commencing the associated modification activities.

Our letter dated April 24, 1984 previously addressed Item II.E.1.2 for TMI-1. That letter forwarded our final Safety Evaluation for Item II.E.1.2 part 2 (flow indication) and provided our tentative acceptance for Item II.E.1.2 part 1 (flow initiation). As stated, final acceptance for Item II.E.1.2 part 1 is dependent upon our receipt and review of design information that is sufficiently detailed to demonstrate conformance to the stated requirements of the item. Consistent with staff commitments in NUREG-0680, Supplement 3, we intend to conduct a preimplementation review of this item. Therefore, we request that you submit the needed information as soon as the detailed design is complete, but in any case, by no later than 90 days prior to commencing the associated modification activities. Please reference this letter in your response.

Sincerely,

*ORIGINAL SIGNED BY
JOHN F. STOLZ*
