

JUL 02 1984

Docket No. 50-454  
Docket No. 50-455

Commonwealth Edison Company  
ATTN: Mr. Cordell Reed  
Vice President  
Post Office Box 767  
Chicago, IL 60690

Gentlemen:

The Nuclear Regulatory Commission has completed its SALP Assessment relating to the performance of your reactor facility and will present its findings at a meeting on July 21, 1984, at 1:00 p.m. at the Region III Offices. Arrangements for this meeting were previously made between T. Tramm of your staff and myself on June 28, 1984.

We encourage Commonwealth Edison to have appropriate corporate and plant management representation at the meeting to ensure a mutual understanding of the issues and findings being presented by NRC.

While this meeting is considered a presentation and discussion forum between Commonwealth Edison Company and the NRC, the meeting will be opened to any other interested parties as observers. Those persons outside the licensee and NRC staffs should inform the Regional Office, well in advance of the meeting, of their intent to participate, so possible space limitations can be accommodated.

We hope this meeting will benefit your organization and provide you with a meaningful characterization of the overall safety performance for the Byron plant.

Sincerely,

"Original Signed by J. F. Streeter"

J. F. Streeter, Director  
Byron Project Division
