Gentlemen:

SUBJECT: REPORT NOS. 50-424/83-13 AND 50-425/83-13

Thank you for your responses of November 14, 1983 and January 10, 1984, to our Notice of Violation issued on October 14, 1983, concerning activities conducted at your Vogtle facility. We have evaluated your responses and found that they meet the requirements of 10 CFR 2.201. We will examine the implementation of your actions to correct violations A, B and C during future inspections.

After careful review of the bases for your denial of violation D (No. 50-424/83-13-04), we agree with your position with respect to the requirements that your A/E approve the memo in question as a Design Change and have deleted it from our records as a violation. The dissemination of information identified as inspection criteria by means other than controlled procedures is considered an unresolved item No. 50-424/83-13-09 "Control of Field Memos Which Affect Inspection Acceptance Criteria," pending further NRC inspection.

We appreciate your cooperation in this matter.

Sincerely,

Richard C. Lewis, Director
Division of Reactor Projects
