RE: IN THE MATTER OF:
PHILADELPHIA ELECTRIC COMPANY
(Limerick Generating Station
Units 1 and 2)
DOCKET NOS. 50-352, 50-353

Dear Sirs:

Pursuant to the direction of the Board, I am submitting the following memo containing the City's issues in the area of emergency planning with transcript references.

CITY - 18

The State Plan is inadequate in the area of emergency planning because in the plan there is no adequate implementable plan for providing an alternate source of water for the City of Philadelphia which is appropriate to the locale of Philadelphia and which gives consideration to the PAG guidelines, namely, substitution of other drinking water sources, importation of water, rationing, substitution of other beverages and designation of critical users. "Implementable plan" includes consideration of ability to implement in which is included resources available.

CITY - 19

The State Plan is inadequate in the area of emergency planning because in the plan there is no adequate implementable plan or implementable alternatives and methods for decontamination of the City's water supply and water supply system. "Implementable plan" includes consideration of ability to implement in which is included resources available.
