Mr. J. B. Sinclair
Licensing Engineer
Vermont Yankee Nuclear Power Corporation
1671 Worcester Road
Framingham, Massachusetts 01701

Dear Mr. Sinclair:

SUBJECT: REACTOR PROTECTION SYSTEM POWER MONITORING
SYSTEM DESIGN MODIFICATIONS

Re: Vermont Yankee Nuclear Power Station

We have completed our review of the subject modifications for your facility. Our review was based on your past submittals as referenced in the enclosed Safety Evaluation. We find your proposed design modifications and the Technical Specification changes you intend to submit, as described, to be acceptable.

It is our understanding that the interim relay setpoints modification will be implemented by the end of your 1984 refueling outage, and that proposed Technical Specifications in the form of a request for modification of your license will be submitted no later than February 1985.

This completes our review of this issue except for your forthcoming Technical Specification submittal which should conform to the appropriate guidance contained in the Safety Evaluation and the enclosed Technical Evaluation Report.

Sincerely,

Original signed by/

Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
