RE: Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441
Cooling of the Reactor Core
Isolation Cooling Room [RDC 72(83)]

Dear Mr. Keppler:

In our final report dated June 10, 1983, concerning cooling of the Reactor Core Isolation Cooling (RCIC) room during a Loss of Coolant Accident we stated that corrective action would include review of Safety Systems, and issuance of design modification by Gilbert Associates, Inc., the Architect/Engineer, and implementation of the modifications. Subsequent correspondence on this subject was dated August 16, 1983, and December 21, 1983.

This letter has been written to inform you that Engineering Change Notice 18848-86-314 was issued to document the necessary design modifications for Unit 1. Implementation of these modifications is now anticipated by November 1, 1984. We will advise you by December 6, 1985, about the status of the Unit 2 design modifications.

Please call if there are additional questions.

Sincerely,

Murray R. Edelman
Vice President
Nuclear Group
