Boston, Massachusetts 02199

Dear Mr. Harrington:

SUBJECT: NUREG-0737, ITEM II.K.3.22 -
AUTOMATIC SWITCHOVER OF RCIC SUCTION

Your letter dated November 18, 1983, informed us that you plan to incorporate automatic switchover of the reactor core isolation cooling (RCIC) system suction at the Pilgrim Station in accordance with Item II.K.3.22 of NUREG-0737. Your letter also indicates that specific plans and schedules for this modification will be factored into your Long Term Program (LTP) of modifications to be made at the station.

Schedule B of the LTP received with your letter dated May 7, 1984, indicates that the automatic switchover installation is to be completed by the end of Refueling Outage Number 7. That is presently expected to occur during the third quarter of 1986.

On the basis of your commitment and schedule for implementation of provisions to meet the requirements of II.K.3.22, we consider this generic issue to be closed with respect to the Pilgrim Station. However, you should note from our letter to you dated December 30, 1982, that this modification must meet the criteria enclosed with that letter and the installation will be subject to a post-implementation review.

Sincerely,

Original signed by/

Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
