Transfer of Very Low-Level Waste to Exempt Persons for Disposal

**Document:** NRC-2020-0065-DRAFT-0036

Comment on FR Doc # 2020-04506

## Submitter Information

**Name:** Joseph Schueler

## General Comment

We've been down this road before, Idaho will not accept radioactive waste, don't even try it. We are not the dumping ground for America's poor policy decisions. We've had contamination from leaking, nuclear waste above the Snake River Aquifer before and the feds still have yet to fully clean up this horrendous situation, all due to the risk to exposure. The Snake river Acquiifer provides necessary drinking water for hundreds of thousands of residents including the largest population in Idaho, Ada County.

Now, the administration who is screwing up every other aspect of our every day life wants to dump nuclear waste in Idaho once again?

No, I flatly reject this proposal and find it beyond reprehensible that during a gloabl pandemic, we would be taking such foolhardy, dangerous, and potentially fatal steps and with so little oversight, public awareness and comment, and even logical decision making.
