SUBJECT: ALTERNATE REQUALIFICATION PROGRAM FOR DETAILED
SENIOR REACTOR OPERATOR

This is in response to your letter dated August 11, 1995, concerning a proposed alternate requalification program for a licensed senior reactor operator at the Grand Gulf station. We concur with your proposed alternative requalification program and with the intent that Mr. Jablonski will meet the requirements outlined in your letter before being returned to functional status.

In addition, prior to returning to licensed duties, Mr. Jablonski should complete training on:

1. Any Technical Specifications modified or added during absence;
2. New abnormal, emergency, and integrated procedures and any changes to existing procedures which occurred during his absence; and
3. Any plant safety system modifications that occurred during his absence.

We request that, before Mr. Jablonski returns to licensed duties, Grand Gulf certify, in writing, to Region IV that he has successfully completed the alternate Grand Gulf licensed operator requalification program requirements described in your letter, with the above additions.

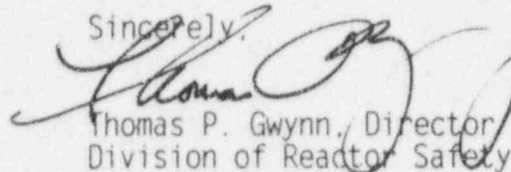

Please be advised that, since Mr. Jablonski will not participate in the Grand Gulf requalification program, he should not direct the activities of licensed operators and should not manipulate the controls of the Grand Gulf facility until completing the program described above and receiving an amended license so permitting. His current license has been amended to reflect these conditions.
