Transfer of Very Low-Level Waste to Exempt Persons for Disposal

Document: NRC-2020-0065-DRAFT-0046

Comment on FR Doc # 2020-04506

Submitter Information

Name: Nathanael Nerode

General Comment

This is a potentially extremely unsafe proposal, as it will spread the VLL radioactive waste throughout numerous poorly regulated surface burial sites. If there are any problems with the process, it will be extremely difficult and expensive to track down the resulting "hot spots".

Worse, it is criminally negligent to attempt to put this rule through during the current coronavirus emergency when the experts, including state governments and universities, who would normally provide comments are distracted, possibly confined to their homes, and unable to provide substantive comments to improve the proposed rule. Withdraw this rule for now and restart your regulatory process after the emergency is over. Anything else would be criminally negligent.
