

5/B5

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

MAY 13 1982

NOTE TO: Joe Kane, HGEB, DE
FROM: James P. Knight, A/D for Components & Structures Engineering, DE
SUBJECT: MIDLAND UNITS 1 & 2

By now you probably have a copy of the attached. With the pressure of time I decided to take unilateral action in reflecting R. Vollmer's comments on your draft of the acceptance provisions for Phase 2. Based on our conversations I trust that this was an adequate representation of the requirements as you see them. If this is not the case then I also trust that I will hear from you. The final transmittal to the applicant should move through DE (at least CSE) for concurrence. At that time we can discern the extent of the requirements for documentation and notification of the Region.

cc: R. Vollmer
G. Lear
L. Heller
