MIDLAND ENERGY CENTER PROJECT
MIDLAND DOCKET NOS 50-329 AND 50-330
QUALITY ASSURANCE PROGRAM PLAN (QAPP) FOR THE
SHUTDOWN PHASE OF THE MIDLAND ENERGY CENTER
FILE: 1300, 2.0 SERIAL: 31666

Transmitted with this letter are five copies of Revision 0 of the Quality Assurance Program Plan (QAPP) for the Shutdown Phase of the Midland Energy Center. It applies to Midland Units 1 and 2. This submittal reflects the concepts discussed during our meeting of August 24, 1984 at your office. Your review and concurrence is requested.

This QAPP supersedes Topical Report CPC-1A (Volume I), the Quality Assurance Program Procedures Manual (Volume II), and the Quality Assurance related commitments in the FSAR. Neither Volume I, Volume II nor the FSAR will be updated during the Shutdown Phase. These program documents were developed to meet the complex needs of the design and construction phase of the Midland Project. The Shutdown Phase QAPP represents an adaptation of the QA Program to meet the needs of the Shutdown Phase and to be responsive to the Project objectives stated in paragraph 2.0 of the QAPP Introduction.

Full compliance with the Shutdown Phase QAPP will be achieved by January 1, 1985. The period between now and then provides for a transition from the existing program, to which we are now working, to compliance with the Shutdown Phase QAPP. Specifically, this period will be used to prepare and put into effect the necessary implementing procedures. It should be recognized that while the QAPP addresses criteria for all activities which might occur during

the Shutdown Phase, our expectation is that many activities will not occur.
Thus, implementing procedures will be prepared only when a need is identified.
