Docket Nos. 50-325/324

Mr. E. E. Utley
Executive Vice President
Carolina Power & Light Company
Post Office Box 1551
Raleigh, North Carolina 27602

Dear Mr. Utley:

SUBJECT: DEMONSTRATION OF CONTAINMENT PURGE AND VENT VALVE OPERABILITY

Re: Brunswick Steam Electric Plant, Units 1 and 2

We have completed our review of the information submitted concerning operability of the containment purge and vent valves for Brunswick 1 and 2. Based on our review, we find that the information submitted demonstrated the ability of the Posi-Seal International 4-inch, 8-inch, 18-inch, 20-inch and 24-inch valves to close against the buildup of containment pressure in the event of a DBA/LOCA when these valves are limited by mechanical means to an opening angle of 50° or less.

Appropriate Technical Specifications which reflect the limitation of opening angle for these valves should be submitted to the NRC within 90 days of the receipt of this letter. Our related Safety Evaluation is enclosed.

Sincerely,

Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
