JUL 12 1984

MEMORANDUM FOR: Richard P. Denise, Director  
Division of Reactor Safety & Projects, RIV

FROM: Darrell G. Eisenhut, Director  
Division of Licensing, NRR

SUBJECT: FORT ST. VRAIN NUCLEAR GENERATING STATION SECURITY  
PLAN CHANGE

By letter dated January 31, 1984, Public Service Company of Colorado (PSC) submitted Revision 14 to the Physical Security Plan for the Fort St. Vrain Generating Station as a 10 CFR 50.54(p) change to your office.

Jim Kelly, Region IV, referred this submittal directly to the Safeguards Division, NMSS. Revision 14 has been reviewed and determined that for the most part the changes are consistent with 10 CFR 50.54(p) and are therefore acceptable. However, there are certain portions, as set forth in the enclosure, that decrease plan effectiveness and can only be authorized by license amendment. Accordingly, the licensee should be instructed to follow their previously accepted plan in regard to these items. Should PSC want to pursue changing the security plan with respect to the changes set forth in the enclosure, they should resubmit under the provisions of 10 CFR 50.90.

A proposed letter to the licensee and review comments are submitted to your office for forwarding to the licensee.

Please provide a copy of your response to the licensee on this matter to the Chief, SSPB/DL/NRR and the Chief, SGPR/SG/NMSS.

The enclosure to this letter contains Safeguards Information which is required to be protected against unauthorized disclosure in accordance with 10 CFR 73.21.
