### II. Background

The NRC, in collaboration with the Department of Homeland Security, has identified several instances where a licensee has FAILED to appropriately verify, in the case of foreign nationals seeking UA and/ or UAA, that the claimed non-immigration status that the individual has provided is correct. Consequently, foreign nationals have been granted UA and UAA at United States nuclear power plants for the purpose of work using visa categories that DO NOT permit foreign nationals to work in the United States.

The NRC and DHS cannot allow this!

Foreign nationals do not necessarily care about the health and safety of the United States. Such foreign nationals are highly susceptible to being enticed to imperil the US nuclear industry for monetary or political gain. aka, espionage.

These "licensees" should loose their status, be fined and imprisoned for so callously jeopardizing the safety of the United States's nuclear industry, its citizenry and its mere existence.
