Commission Secretary,
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555
ATTN: Docketing and Service Branch

Docket 50-397 *OL*

Subject: 49 Federal Register 24957: "Washington Public)
Power Supply System; Consideration of Issuance)
of Amendment to Facility Operating License and)
Proposed No Significant Hazards Consideration)
Determination and Opportunity for Hearing.")

Secretary:

Living within twenty (20) miles of the Washington Public Power Supply System's (WPPSS's) disasterous Project No. 2, I wish to strongly object to changing of Technical Specification Special Test Requirements 3.10.5 and the exemption from requirements in 10 CFR 50.44(C)(3)(i) the licensee requests.

Any increment of safety for the public, be it ever so small, should supercede the "speed and convenience" these proposed changes and exemptions would provide--especially considering the past "track-record" of bumbling and inept behavior by the mendacious Washington Public Power Supply System.

Sincerely yours,

Larry Caldwell
