SUBJECT: IN THE MATTER OF 238 NUCLEAR ISLAND GENERAL ELECTRIC
STANDARD SAFETY ANALYSIS REPORT (GESSAR II) DOCKET
NO. STN 50-447

RESOLUTION OF APPLICABLE UNRESOLVED SAFETY ISSUES
IN GENERIC ISSUES FOR GESSAR II

Reference: Memorandum for C. O. Thomas (NRC) from D. C. Scaletti (NRC),
"GESSAR II Meeting Summary", June 7, 1984

In the referenced Memorandum, closure activities for the GESSAR II review in accordance with the draft Commission Policy on Severe Accidents (NUREG-1070) were enumerated. One of the items requiring additional General Electric input was the documentation of the Technical Resolution of all applicable unresolved safety issues (USIs) and high and medium priority generic safety issues (GSIs). The applicable USIs and GSIs had been previously agreed upon in a meeting held on May 10, 1984. The attached report, "Resolution of Applicable Unresolved Safety Issues and Generic Issues" (NEDO-30670), provides the technical resolution required by the draft Commission Policy on Severe Accidents.

If there are any questions on the information provided herein, please contact me or K. W. Holtzclaw (408) 925-2506 or J. N. Fox (408) 925-5039.

Very truly yours,

M.A. D'Arbonne for J.F. Quirk
