ARTHUR E. LUNDVALL, JR.
VICE PRESIDENT
SUPPLY

Director of Nuclear Reactor Regulation
Attention: Mr. J. R. Miller, Chief
Operating Reactors Branch #3
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Calvert Cliffs Nuclear Power Plant
Units Nos. 1 & 2; Dockets Nos. 50-317 and 50-318
NUREG-0737 Item II.K.3.25, Reactor Coolant Pump
Seal Integrity Following Loss of Offsite Power

Reference: NRC Letter from D. G. Eisenhut to A. E. Lundvall, Jr.,
dated August 29, 1984.

Gentlemen:

In the referenced letter you requested that we demonstrate why our operating license should not be modified to require automatic initiation of reactor coolant pump seal cooling upon a loss of offsite power. To fully address the issues addressed by your letter we will require additional time to prepare our response. Thus, we request a six-week extension to the response deadline. This time will be used to ensure that all implications associated with an automated seal cooling supply are thoroughly considered and that the suggested plant modifications are consistent with the safety concerns addressed by USI A-44, Station Blackout and Generic Issue A-23, Reactor Coolant Pump Seal Integrity.

If you should have any questions concerning this request, please contact us.

Sincerely,

AEL/BSM/vf
