

TUSKEGEE INSTITUTEDOCKET NO. 50-406ORDER AUTHORIZING DISPOSITION OF COMPONENT PARTS AND  
TERMINATION OF FACILITY LICENSE

By application dated August 9, 1983, Tuskegee Institute (the licensee) requested authorization from the Nuclear Regulatory Commission (the Commission or NRC) to dismantle the Tuskegee AGN-201 Reactor (the facility), a research and training reactor located on the Institute's campus at Tuskegee, Alabama, to dispose of the component parts, and to terminate Facility License No. R-122. The authorization would allow the licensee to dismantle the facility, dispose of the component parts in accordance with the application, and terminate Facility License No. R-122. A "Notice of Proposed Issuance of Order Authorizing Disposition of Component Parts and Termination of Facility License," dated June 5, 1984, was published in the Federal Register on June 12, 1984. No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has found the facility has been decontaminated, that satisfactory disposition has been made of the fuel, and the component parts can be disposed of without restriction in accordance with the Commission's regulations in 10 CFR Chapter I, and in a manner not inimical to the common defense and security or to the health and safety of the public.

PDR

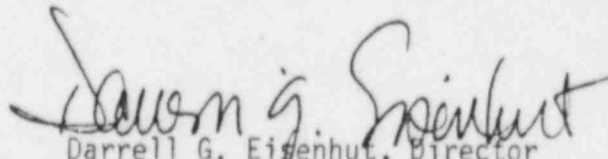

The facility area has been inspected by NRC Region II inspectors and radiation surveys confirm that radiation levels meet the values acceptable to the Commission, and the area is available for unrestricted access.

Therefore, pursuant to the application filed by Tuskegee Institute, the licensee is hereby authorized to dispose of the component parts of the reactor, and Facility License No. R-122 is hereby terminated as of the date of this Order.

For further details with respect to this action see (1) the application for authorization to dismantle facility and dispose of components parts and for termination of facility license, dated August 9, 1983, (2) the Commission's Safety Evaluation related to the termination of the license, and (3) the Notice of Proposed Issuance of Order Authorizing Disposition of Component Parts and Termination of Facility License published in the Federal Register on June 12, 1984 at 49 FR 24189. Each of these items is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. Copies of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 2 day of October 1984.

FOR THE NUCLEAR REGULATORY COMMISSION

  
Darrell G. Eigenhut, Director  
Division of Licensing
