

OCT 05 1984

Docket No. 50-440

The Cleveland Electric Illuminating
Company

ATTN: T. Silakoski, Training
Manager

Perry Nuclear Project
10 Center Road
Perry, Ohio 44081

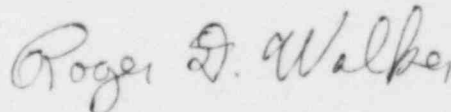

Dear Mr. Silakoski:

The Operator Licensing staff has been reviewing the status of licensing actions taken at the Perry Nuclear Project. Since there has been an extended period between your initial examinations and your scheduled fuel load date, a complete re-examination may be warranted. In order for us to come to a decision regarding this matter we must request additional information.

Please furnish us with a listing of any further, or additional training the initial applicants received since the written examination. Include in your listing a brief explanation of the topics covered, the length, and if the session was self study or formal instruction.

Following the review of the requested information, you will be informed of our decision regarding a re-examination. If you need further information please contact Mr. J. McMillen or Mr. T. Lang of the Operator Licensing Section.

Sincerely,

R. D. Walker, Chief
Operations Branch
