MEMORANDUM FOR: Karl V. Seyfrit, Chief
Reactor Operations Analysis Branch
Office for Analysis and Evaluation
of Operational Data

AEOD/T413

FROM: Wayne D. Lanning, Lead Engineer
Reactor Operations Analysis Branch

SUBJECT: TR No. AEOD/T413
FAILURE OF FIRE DAMPER IN SAFEGUARDS VENTILATION SYSTEM

Forwarded herewith is the subject technical review report for your consideration.

Region II is preparing a memorandum to NRR identifying this issue as a potential generic concern. As a result, a decision was made to endorse the Region's action instead of AEOD making a similar request to NRR. I will follow the activities associated with the resolution of the issue to ensure that our concerns are included.

By copy of this memorandum to PTB, this issue is suggested as a future article in Power Reactor Events.
