

OCT 5 1984

Docket No. 50-458

APPLICANT: Gulf States Utilities Company (GSU)
FACILITY: River Bend Station (RBS)
SUBJECT: SUMMARY OF DETAILED CONTROL ROOM DESIGN REVIEW (DCRDR) AUDIT
EXIT MEETING

The meeting was held at the RBS site on July 27, 1984. A list of persons participating in the meeting is included as Enclosure 1.

The purpose of the DCRDR is to identify and correct human engineering discrepancies (HEDs) that might affect the operator's ability to prevent or cope with an accident. DCRDR's are conducted using the guidance provided in NUREG-0700, "Guidelines for control Room Design Reviews," dated September 1981. This audit followed staff review of the GSU DCRDR Program Plan submitted on January 31, 1984.

The DCRDR audit examined the quality and structure of the GSU DCRDR team as well as the function and task analyses as performed by that team. The audit additionally examined how the Emergency Procedure Guidelines were fitted to the task analyses.

The audit team will provide an audit report in October 1984 describing the audit findings and determining what actions are required by GSU to fully meet NRC Task Action Plan Item I.D.1.
