

ENCLOSURE 1

NOTICE OF VIOLATION

Duke Power Company
Oconee

Docket Nos. 50-269, 50-270 and 50-287
License Nos. DPR-38, DPR-47 and DPR-55

The following violations were identified during an inspection conducted on April 9-13, 1984. The Severity Levels were assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

10 CFR 20.201(b) requires a licensee to make such surveys as may be necessary to comply with the regulation in each section of 10 CFR 20. A "survey" is defined in 10 CFR 20.201(a) as an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials or other sources of radiation under a specific set of circumstances.

Contrary to the above, the licensee did not make such surveys as were necessary to ensure that personnel exposures to radiation were properly recorded. Approximately ten percent of the extremity monitoring dosimeter data for the months of March and April 1984 was lost from the system and a similar potential existed for whole body exposure data.

This is a Severity Level IV violation (Supplement IV).

Pursuant to 10 CFR 2.201, you are required to submit to this office within 30 days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved.

Security or safeguards information should be submitted as an enclosure to facilitate withholding it from public disclosure as required by 10 CFR 2.790(d) or 10 CFR 73.21.

Date: MAY 11 1984
