SUBJECT: NUREG-0737 Item II.F.1.1,  
Noble Gas Accident  
Monitoring Instrumentation

REF: 1) P-84191, D. W. Warembourg  
to E. H. Johnson, Dated  
July 2, 1984

Dear Mr. Johnson:

I would like to take this opportunity to clarify our commitment date for modification of our reactor plant exhaust stack noble gas radiation monitoring system. In Reference 1, we stated that our system would be ". . . installed and operable by the 4th Refueling Cycle." More correctly stated, our action will be completed prior to the end of our 4th refueling outage, which is currently scheduled for mid to late 1985.

We regret any confusion this may have raised; please contact Mr. Ted Borst of my staff at (303) 571-7436, Extension 203 with any questions or concerns.

Very truly yours,

*Don W. Warembourg*
