File Nos. G9.5, G15.4.1

Mr. John T. Collins, Regional Administrator
U. S. Nuclear Regulatory Commission
Region IV, Office of Inspection and Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Dear Mr. Collins:

River Bend Station Unit 1
Refer to: RIV
Docket No. 50-458/Report 84-16

This is in response to the Notice of Violation contained in NRC I&E Inspection Report No. 50-458/84-16. The inspection was conducted at the River Bend Station construction site by Mr. William McNeill during the period July 9-15, 1984, of activities authorized by NRC Construction Permit CPPR-145 for River Bend Station Unit No. 1.

Gulf States Utilities Company's (GSU) response to the Notice of Violation 84-16-01, "Failure to Effectively Control Documents," is provided in the enclosed attachment. This completes GSU's response to the Notice of Violation.

Sincerely,

W. J. Cahill
Sr. Vice President
River Bend Nuclear Group

WJC/~~WJC~~/PJD/ip

Response to Notice of Violation

Reference

Notice of Violation - E. H. Johnson letter to W. J. Cahill, dated August 2, 1984.

Refer to: Docket 50-458/84-16

Failure to Effectively Control Documents (84-16-01)

Response

Corrective Steps Which Have Been Taken and the Results Achieved

- a. As noted, corrective action was taken immediately to update the computer reports. New copies of the IS-217 and IS-256 reports were run and filed in Station 8. New revisions and issues of drawings, Engineering and Design Coordination Reports and other documents were filed, and superseded information was destroyed. An overall assessment was made including a complete distribution verification and a 100% station surveillance. The station is up-to-date.
- b. Stations Nos. 8 and 73 were completely reviewed and all voided documents were stamped "void" per procedure CSI 11.0.5 (Drawing Station Control). All documents are complete and up-to-date; superseded information that is retained is stamped "void."
- c. At the time of the audit, Station 55's listing was established and posted. A complete distribution verification was performed to ensure correct distribution requirements for Station 55 were being met. The Station is complete and up-to-date. Requirements are being met.

Corrective Steps Taken to Avoid Further Violations

- a. A station employee was terminated after further assessments were made. The new hire was personally trained by a Document Control Supervisor, and station maintenance was administered during the training process. The station will receive regular surveillance to ensure station maintenance.

- b. The exact requirements of procedure CSI 11.0.5 were reviewed with the ANI Station 73 Supervisor. Regular station surveillance will be conducted to ensure station maintenance.
- c. Regular surveillance providing an in-depth investigation will be performed on stations in general to preclude problems of this sort. Station 55 employees have been directed to receive training on station maintenance.

Date When Full Compliance was Achieved

- a. Full compliance was achieved as of July 15, 1984.
- b. Full compliance was achieved as of August 10, 1984
- c. Full compliance was achieved as of August 10, 1984.
