Office of Nuclear Reactor Regulation  
Division of Licensing  
Washington, DC 20555

- References: (1) Letter from J. R. Miller to W. C. Jones,  
dated July 24, 1984
- (2) Docket No. 50-285

Dear Mr. Miller:

Safety Parameter Display System (SPDS)

The Omaha Public Power District received your letter dated July 24, 1984, Reference (1), requesting additional information about the SPDS at Fort Calhoun Station. Due to the broad scope of the information requested, the District determined an independent review of the information package is necessary prior to its submittal to the Commission.

The independent review is currently in progress and will be completed by December 7, 1984. It is therefore requested the District be permitted to delay submittal of the SPDS information package until December 7, 1984. This topic and its associated circumstances have been discussed with Mr. E. G. Tourigny of your staff on October 15, 1984.

The District is confident this information package will adequately answer the Commission's questions about the Fort Calhoun Station SPDS and will aid in the completion of the SPDS review in a timely manner.

Sincerely,

R. L. Andrews  
Division Manager  
Nuclear Production
