Mr. Harold R. Denton, Director
 Office of Nuclear Reactor Regulation
 U.S. Nuclear Regulatory Commission
 Washington, DC 20555

Subject: Byron Station Units 1 and 2
GDC 51 Compliance Review
NRC Docket Nos. 50-454/455

References (a): E. D. Swartz letter to H. R. Denton
 dated February 22, 1984

(b): E. D. Swartz letter to H. R. Denton
 dated August 9, 1984

Dear Mr. Denton:

References (a) and (b) provided the compliance review against GDC 51 for the reactor containment pressure boundary components of our Byron Station. This matter was discussed during conference calls with members of your staff on October 15-17, 1984. The purpose of this letter is to provide an update of the Reference (b) material based on our conference call discussions.

One signed original and fifteen copies of this letter with the updated compliance review are provided for your use. However, due to the voluminous nature of the attachments associated with the review, only three copies are being provided. Additionally, one full copy is being sent to Ms. Janice A. Stevens.

Very truly yours,

E. Douglas Swartz
 Nuclear Licensing Administrator
