Duke Power Company
ATTN: Mr. H. B. Tucker, Vice President
Nuclear Production Department
422 South Church Street
Charlotte, NC 28242

Gentlemen:

SUBJECT: REPORT NOS. 50-369/84-26 AND 50-370/84-23

On August 20-22, 1984, NRC inspected activities authorized by NRC Operating License Nos. NPF-9 and NPF-17 for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

We are concerned about the numerous problems that have been identified with Kerotest packless globe valves and their application at your McGuire facility. Consequently, we request that you inform us of those corrective actions taken, your plans to address the identified problems, and those recommendations identified in paragraph 6 of the enclosed report.

In accordance with 10 CFR 2.790(a), a copy of this letter and enclosure will be placed in the NRC Public Document Room unless you notify this office by telephone within 10 days of the date of this letter and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).

Should you have any questions concerning this letter, please contact us.

Sincerely,

(Original signed by VLBrownlee)
Hugh C. Dance, Chief
Reactor Projects Branch 2
Division of Reactor Projects
