Docket No. 50-366

JUL 23 1984

Georgia Power Company
ATTN: Mr. J. T. Beckham, Jr.
Vice President and General Manager
Nuclear Generation
Post Office Box 4545
Atlanta, Georgia 30302

Gentlemen:

Enclosed is your Check No. 913525, dated July 11, 1984, in the amount of \$4,000 which accompanied your application dated July 12, 1984 (NED-84-75), for Technical Specifications to provide an additional restriction on the Hatch Nuclear Plant Unit 2 operation during the LCO with one recirculation loop out of service. It is our understanding that this change is necessary before operation in the Extended Load Line Limit Analysis (ELLLA) Region requested February 6, 1984, can be permitted.

Since your application was filed after the June 20, 1984 effective date of the revised 10 CFR 170 (copies enclosed) on fees, it is subject to the provisions of the revised rule. This rule requires that licensees remit an application fee of \$150 with each application for license amendment, relief, exemption and other requests. Subsequently, the NRC will bill the licensee at six-month intervals for the review of the application until the review is completed. The fees for license amendments and other approvals are based on the full cost (professional staff hours and contractual services) expended for the review. However, the maximum which can be charged for an application is the amount in the rule in effect at the time the amendment or other approval action is issued. This amount is currently \$164,600 (10 CFR 170.21.A). Credit for the \$150 application fee will be given at the time the first bill is sent to your Company. Any applications filed by your Company before June 20, 1984, will continue to be processed in accordance with the fee provisions of 10 CFR 170.22 of the March 23, 1978 regulation.

It is requested that your Company remit the required application fee of \$150 for your July 12 application. For your information, a brief discussion of fees for
