

APPENDIX A

NOTICE OF VIOLATION

Consolidated Edison Company  
Indian Point Unit 2

Docket No. 50-247  
License No. DPR-26

As a result of the inspection conducted on May 14 - June 15, 1984, and in accordance with the revised NRC Enforcement Policy (10 CFR 2, Appendix C), published in the Federal Register on March 8, 1984 (49 FR 8583), the following violation was identified:

Technical Specifications, Section 6.11, requires the licensee to prepare procedures for personnel radiation protection, consistent with the requirements of 10 CFR 50 Part 20. Such procedures shall be approved, maintained, and adhered to for all operations involving personnel radiation exposure.

The licensee's procedure EHS 3.101, "Access Control Areas," Revision 0, Section 2.4.1 requires that all access points to a high radiation area be conspicuously posted with a sign bearing the legend, "Caution, High Radiation Area." Section 2.4.4 of procedure EHS 3.101 states that access to high radiation areas in which the intensity of radiation is greater than 1000 mr/hr will be actively guarded to prevent unauthorized entry. Section 2.5.1 of procedure EHS 3.101 requires that all access points to an airborne radioactivity area be conspicuously posted with a sign bearing the legend, "Caution, Airborne Radioactivity Area."

Contrary to the above, on June 5, 1984, during an inspection of the reactor containment building with the plant in cold shutdown, in preparation for refueling and maintenance activities, the resident inspectors identified an access point to a high radiation and airborne radioactivity area, which had no conspicuously posted High Radiation Area signs, guarded control point, or conspicuously posted High Airborne Radioactivity signs.

This is a Severity Level IV Violation. (Supplement IV)

Pursuant to the provisions of 10 CFR 2.201, Consolidated Edison Company of New York, Inc. is hereby required to submit to this office within thirty days of the date of the letter which transmitted this Notice, a written statement or explanation in reply, including: (1) the corrective steps which have been taken and the results achieved; (2) corrective steps which will be taken to avoid further violations; and, (3) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending this response time.
