

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

H. Bear
Heller
OCT 28 1982
Kane

Docket Nos.: 50-329/330

MEMORANDUM FOR: Elinor G. Adensam, Chief
Licensing Branch #4, DL

THRU: *JK* James P. Knight, Assistant Director
for Components & Structures Engineering, DE

FROM: Franz P. Schauer, Chief
Structural Engineering Branch, DE

SUBJECT: MIDLAND ASLB HEARINGS - STRUCTURAL ENGINEERING INPUT -
JUDGE HARBOUR'S CONCERN

Plant Name: Midland Plant Unit 1 and 2

Licensing Stage: OL

Responsible Branch: LB #4, D. Hood and R. Hernan, LPM

Requested Completion Date: October 28, 1982

Status: Complete

In response to the verbal request of M. Wilcove of OELD, we have reviewed the transcript provided by OELD and have determined that the SEB area of concern identified by Judge Harbour applies only to consideration of structure-to-structure interaction.

The recent SSER No. 2 of October, 1982, addresses Judge Harbour's concern for the postulated structure-to-structure interaction between the Turbine Building and the Control Tower and Electrical Penetration Wings of the Auxiliary Building and, also, between the Service Water Pump Structure and the Circulating Water Intake Structure. Section 3.7.2.4 (Structural-to-Structure Interaction) of SSER No. 2 discusses the potential for interaction between these buildings and provides information on clearance provided between these respective buildings for critical dynamic conditions. The analysis of actual and required clearance values as discussed in this section indicate that there is no contact between these structures, even considering loading conditions that include the Safe Shutdown Earthquake (SSE).

F. Schauer
Franz P. Schauer, Chief
Structural Engineering Branch
Division of Engineering

ENCL. I

1 of
J. Kane
11/8/82

Subject: Midland Project - Identification of
pertinent SSER #2 Sections To Be Sponsored
by Geotechnical Engineering Section and Consultant
@ Dec. 6, 1982 session on DGB.

DIESEL GENERATOR BUILDING

Sections 2.5.4.4.2, 2.5.4.5.1, 2.5.4.5.2 (Section titled
Diesel Generator Building, p. 2-41), 2.5.4.5.4, 2.5.4.5.5,
2.5.4.5.6, 2.5.4.6.3 and 2.5.4.8.

Enclosure 2

11/8/82
J.Kane

Stamiris Contention No.4

<u>Contention</u>	<u>Where Staff Response Can Be Found</u>	<u>Is there need for oral testimony?</u>	<u>NRC Staff reviewers</u>
4.A.1)	SSEER #2 Section 2.5.4.4.2, pg. * 2-24	Yes. Need to explain how staff has resolved concern for not meeting original PSAR specification (DEC. 6 '82 Session)	J.Kane
4.A.2)	SSEER #2 Section 2.5.4.4.2 * Pgs. 2-33 & 2-34	Yes. Need to explain how future differential settlements have been addressed. This is affected by results of J. Matra study as to whether the future estimated settlements are acceptable. (Dec. 6 '82 Session)	J.Kane
4.A.3)	SSEER #2 Sections 2.5.4.1.3 (pg. 2-4) 2.5.4.2 (Pg. 2-14) 2.5.4.5.5 (* Pg. 2-42)	Yes. Need to indicate that the staff is satisfied with explorations and establishment of properties of fcn. materials including the extent of cohesionless soil pockets. Liquefaction & seismic shakdown evaluations address the loose cohesionless materials. (Dec. 6 '82 or Nov. 15 '82 Session)	J.Kane

* The pages cited are normally the first page of the SSER section. The staff response is included in the discussions which continue after the identified first page of a given section.

Warren Contentions

1. SSER #2
Section 2.5.4.4.2 (Pg. 2-24)
and Section 2.5.4.4.3 (Pg 2-34)

Yes. There is a need to address discussion of Mrs. Warren on components of random fill and to give reasons for staff position on preloading effectiveness.
(DEC. 6 '82 Session)
J. Kane
- 2.B SSER # 2
Section 2.5.4.5.5 (Pg. 2-42)

Yes. It would be helpful for the staff to summarize why liquefaction is not a problem for the structures which Mrs. Warren has identified.
