Ms. Lucila M. Ramos
Head of the Radioactive Effluents Unit
Consejo de Seguridad Nuclear
Justo Dorado 11
28040 Madrid, SPAIN

Dear Lucila:

The purpose of this letter is to furnish information which we discussed during our visit to the Seabrook Nuclear Power Plant while you were in the United States during July of this year.

Enclosed you will find the radiochemical procedure used at Seabrook for rapid determination of Sr-89 and -90 in effluents. Also enclosed is a copy of NUREG/CR-2907, Vol. 13, "Radioactive Materials Released from Nuclear Power Plants (Annual Report for 1992)." Due to budgetary problems, the NRC will be discontinuing publication of this series of reports after the 1993 report is published.

Hopefully, the enclosed information is of value to you. I apologize for not being able to send it sooner.

Sincerely,

Original signed by Thomas H. Essig
