ABSTRACT (Limit to 1400 spaces, i.e., approximately fifteen single-space typewritten lines) (16)

As reported on July 24, 1984, pursuant to License Condition 2.G, our review associated with the updated Fire Hazards Analysis (FHA) resulted in the issuance of two Nonconformance Reports (NCRs) identifying discrepancies involving cable separation and fire wraps.

The conditions identified in these two NCRs constitute additional examples of deficiencies reported previously in LERs 84-001, 84-015, 84-024 and 84-030. Corrective actions described in LER 84-024 will be implemented. Compensatory fire watches have been established in the affected areas.

This report is also submitted to fulfill the requirements of License Condition 2.G relating to License Condition 2.C(14)a and 2.C.(12)a of Operating Licenses NPF-10 and NPF-15 for Units 2 and 3, respectively.
