ATTN: Mr. J. W. Williams, Jr.  
Group Vice President  
Nuclear Energy Department  
P.O. Box 14000  
Juno Beach, Florida 33408

Gentlemen:

SUBJECT: DOCKET NOS.: 50-335 AND 50-389

This acknowledges the receipt of your letter of August 31, 1984, which transmitted Revision 9 to the St. Lucie Physical Security Plan.

Our review of the changes has found portions of the changes to be consistent with the provisions of 10 CFR 50.54(p). Other portions are not consistent with the provisions of 10 CFR 50.54(p) as delineated in the enclosure to this letter. To preclude a violation of regulatory requirements, you must not continue to implement those changes deemed inconsistent. Please revert to the commitments in your previously approved plan or, if desired, modify your plan to accommodate the enclosed comments and resubmit corrected plan pages as necessary to maintain plan continuity. Should you want to pursue those changes deemed inconsistent, you must submit a request to the Commission, Office of Nuclear Reactor Regulation, under the provisions of 10 CFR 50.90 for amendment to your license.

Other changes which were in response to NRR's letter of June 5, 1984, relative to the Underwater Intrusion Detection System (UIDS), are in need of additional clarification. However, this additional information request does not delay the acceptance of your proposed UIDS. You should commence implementation of that system upon receipt of this letter.

The enclosure to your letter is being withheld from public disclosure because it contains Safeguards Information and must be protected in accordance with the provisions of 10 CFR Part 73.21.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the enclosure will not be placed in the Public Document Room.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,
