Docket Nos. 50-348
and 50-364

Mr. R. P. McDonald
Senior Vice President
Alabama Power Company
Post Office Box

Dear Mr. McDonald:

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION - CHANGES
TO REPORTING REQUIREMENTS PER GENERIC LETTER
83-43 - JOSEPH M. FARLEY NUCLEAR PLANT UNITS
1 AND 2

Our review of your request for a license amendment as provided by letter dated February 3, 1984, is underway. Your request is based on the guidance of Generic Letter (GL) 83-43 dated December 19, 1983, relating to recent changes to 10 CFR 50.72 and addition of 10 CFR 50.73.

In GL 83-43 we provided model Technical Specifications with revisions to the "Administrative Controls" and "Definitions" sections which you used to prepare the February 3, 1984 request. However, our review indicates that some changes are needed to other sections of the Farley Technical Specifications, e.g. deletion of "reportable occurrences" in other sections. We have noted certain deficiencies in the submittal and have discussed these with your staff.

On this basis you are requested to provide us with any other changes needed prior our continuing the review. After receipt of the supplemental information the NRC Project Manager will reschedule your requested action. Also, the requested NRC approval date shown as September 1, 1984 in your July 2, 1984 listing of "Licensing Items Requiring NRC Approval" should be revised after consultation with the NRC Project Manager.

The reporting and/or recordkeeping requirements of this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

Sincerely,

/s/ S. Varga
