BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2
DOCKET NOS. 50-325 & 50-324/LICENSE NOS. DPR-71 & DPR-62
REQUEST FOR LICENSE AMENDMENT
ADMINISTRATIVE CONTROLS

Dear Mr. Vassallo:

SUMMARY

In accordance with the Code of Federal Regulations, Title 10, Parts 50.90 and 2.101, Carolina Power & Light Company (CP&L) hereby requests a revision to the Technical Specifications (TS) for the Brunswick Steam Electric Plant (BSEP), Unit Nos. 1 and 2. The proposed changes incorporate the new reporting requirements as defined by the Commission in Generic Letter No. 83-43, dated December 19, 1983. In addition, recent organizational changes at Brunswick and various administrative changes are reflected in the proposed TS pages.

DISCUSSION

The changes relating to the revised reporting requirements are in accordance with guidance provided by the Commission in Generic Letter No. 83-43. This opportunity was taken to make various other administrative changes which include: (1) inclusion of Brunswick title and organizational changes; (2) correction of typographical errors; (3) clarification of terms and mathematical symbols; and (4) repagination. The organizational changes consist of: deletion of the office of Manager - Plant Operations; addition of the Manager - Outages and his staff; a title change from Director - Planning and Scheduling to Manager - Site Planning and Control; a title change from Manager - Operations QA/QC to Manager - QA/QC Brunswick and Robinson; a title change from Principal QA Specialist Performance Evaluation Unit to Manager - QA Services; and a shift of responsibility for Fire Brigade training from the Manager - Operations to the Director - Training. A summary list of the revisions is provided with each Unit's proposed TS pages in Attachments 1 and 2.

SIGNIFICANT HAZARDS ANALYSIS

The Commission has provided guidance concerning the application of its standards set forth in 10 CFR 50.92 for no significant hazards consideration by providing certain examples published in the Federal Register on April 6, 1983 (48 FR 14864). Examples of an amendment likely to involve no significant

hazards consideration include: (i) a change which is purely administrative in nature, for example, a correction of an error, or a change in nomenclature; and (vii) a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations. This request has been reviewed and it is believed that revisions relating to the new reporting requirements fall under the criteria of example (vii) while other changes relate to example (i). Therefore, it has been determined that this amendment involves no significant hazards consideration.

ADMINISTRATIVE INFORMATION

The proposed Brunswick TS pages are provided in Attachment 1 and Attachment 2. Generic Letter No. 83-43 states that since the amendment is clarifying and made at the request of the Commission, no license fee is required. However, since the scope of changes requested in this submittal goes beyond that which was proposed in Generic Letter No. 83-43, it has been determined that a license amendment application fee is required in accordance with the provisions of 10 CFR 170.12. A check for \$150.00 is enclosed in payment of this fee.

Should you have any questions concerning this submittal, please contact Mr. Sherwood R. Zimmerman at (919) 836-6242.

Yours very truly,

A. B. Cutter - Vice President
Nuclear Engineering & Licensing
